Literary Revolution & Universal Knowledge.

An Encyclopædia in 20 vol., over 16,000 pages; 10 per cent. more matter than any Encyclopædia ever before published in this country, and sold, handsomely and well bound in cloth for \$10, in half morocco for \$15, and printed on fine heavy paper, wide margins, bound in half Russia, gilt top, for \$20-an enterprise so extraordinary that its success beyond all precedent in book publishing, may be fairly claimed to inaugurate a Literary Revolution.

THE LIBRARY OF UNIVERSAL KNOWLEDGE is a reprint entire of the last (1879) Edinburgh edition of "Chambers's Encyclopaedia," with about 40 per cent, of new matter added upon topics of special interest to American readers, thus making it equal in character to any similar work, better than any other suited to the wants of the great majority of those who consult works of reference, and altogether the latest Encyclopædia in the field.

Specimen Volumes in either style will be sent for examination with privilege of return on recipt of proportionate price per volume.

Specime Discounts to all early subscribers, and extra discounts to clubs. Full particulars with Leading principles of the American Book Exchange

I. Publish only looks of real value.

II. Work upon the basis of present cost of making books, about one-half what it was a few years ago III. Sell to inverselirect, and save them 50 to 60 per cent, commission commonly allowed to dealers. IV. The cost of books when made 10,000 at a time is but a fraction of the cost when made 500 at a time-adopt the low price and sell the large quantity.

V. Use good type paper, etc., do careful printing, and strong, neat binding, but avoiding all "padding," fat and heavily-leaded type, spongy paper and gandy binding, which are so commonly resorted to to make books appear large and fine, which greatly add to thier cost but don't add to the value.

VI. To make \$1 and a friend is better than to make \$5 and an enemy.
